Faculty:	Rose Keith
Question:	If you wish to elaborate, please explain your response to Question #1: Instructor displayed an interest in my learning.
Response Rate:	19.15% (9 of 47)
1	Was always willing to answer questions
2	Rose asks questions to make sure that i'm understanding everything correctly and is super attentive if needed.
3	Professor Keith was great at answering questions and was especially helpful in lab. I really liked the opportunity to interact with her in a smaller class size and think she is going to be a great professor especially in upper-level courses where there are smaller class sizes.
4	Professor Keith showed so much care and effort in labs :)
5	Patient, kind, never seemed surprised at individuals questions.
6	In lab, I felt she was very interested in making sure each student understood.
7	Harder to approach with questions as she had a tendency to get flustered.
8	During the lab she would really make sure I didn't just get the answer but knew the answer. She keep on asking me questions until I understood.
9	Always willing to answer questions and take time out of their day to meet with us and explain different concepts for us.

Faculty:	Rose Keith
Question:	If you wish to elaborate, please explain your response to Question #3: The instructor created an in-class environment that was conducive to learning.
Response Rate:	10.64% (5 of 47)
1	powerpoints and lectures
2	Often went a little too fast through power points.
3	Lectures hall and classroom were comfortable to learn in.
4	Lectured, but was interactive with the quiz questions in between slides, and open times for asking questions during class.
5	I really liked the way that professor Keith asked about the speed of her lectures via clickers.

Faculty:	Rose Keith
Question:	If you wish to elaborate, please explain your response to Question #5: The instructor challenged me with new or unfamiliar ideas.
Response Rate:	19.15% (9 of 47)
1	most of the content and especially through the examples
2	Please emphasize what you want to focus on in the material.
3	Made labs for college students, didn't dumb anything down. Wasn't overly/unnecessarily complicated - very professional explanations and labs. Felt like a peer.
4	I took AP biology and resultantlly the concepts and ideas presented in this course were not new to me. However, the information in this course was a good refresher.
5	I love the comprehensive questions from the first test than the vocabulary questions from the second test.
6	I learned things that I never thought I would, especially about plants.
7	I have essentially taken this class before, in AP Biology. Most of the material were topics I had previously covered in that class.
8	I had already learned material from previous classes (120, 130, and 312).
9	Definitely challenged, I had not seen a lot from her sections before and sometimes her explanations were not adequate.

Faculty:	Rose Keith
Question:	If you wish to elaborate, please explain your response to Question #7: The instructor provided helpful feedback.
Response Rate:	14.89% (7 of 47)
1	comments on exams and labs
2	Very intelligent and knowledgeable about this class
3	Very helpful in labs.
4	This feedback helped me on the test.
5	Often times tests were harshly graded with little explanation as to why on certain short answer questions. i.e Multiple choice questions worth 4 points each can easily move a student a letter grade for only missing 1 question
	My most pressing issue with the class was the rigor of which assignments were graded despite instructions.

6	Had a very hard time answering students questions in a clear and concise manner when asked.
7	Feedback on exams was always prompt and constructive

Faculty:	Rose Keith
Question:	If you wish to elaborate, please explain your response to Question #9: The instructor provided clear explanations of important ideas.
Response Rate:	19.15% (9 of 47)

1	usually yes but sometimes it was not very clear
2	good use of powerpoints, average lecturer she was clearly very passionate about subject but sometimes a bit too in depth in explanations making things more confusing
3	Professor Keith was well prepared and used a number of technique to convey important points. I always appreciated her willingness to answer questions and clarify points.
4	More emphasis on the important ideas please do not assume students will be able to depict the main topics of the section if the lectures are all the same. Make them more interactive and discussion based.
5	Lectured, but was interactive with the quiz questions in between slides, and open times for asking questions during class.
6	It was hard for her sometimes to explain things clearly or to pick out which ideas were important.
7	I would walk away knowing I understood something.
8	I felt less inclined to learn when we were discussing information in the diversity unit that was not essential to know. I do not know if this makes sense, but in the biodiversity unit I often thought, "What do we actually have to know?" or "Why are we learning about this _____ (insert very specific animal)?" so I think that part of the class felt much more of an exercise in memorization. Which is fine, but if so, I would have preferred for it to have been presented as, "These are simply things you need to know/memorize."
9	Couldn't sort out what information was important for exam knowledge when asked.

Faculty:	Rose Keith
Question:	If you wish to elaborate, please explain your response to Question #11: The instructor stimulated my enthusiasm for the subject.
Response Rate:	10.64% (5 of 47)

1	There wasn't too much enthusiasm.
2	She's very excited about evolution and her passion for science really shows and in turn piques my interest in the subject too
3	Really interested in what she was teaching and so this helped me be more excited for class and lab as well.
4	Professor Kieth exudes a passion and enthusiasm for teaching and biology that is contagious. I really enjoyed learning from her and hope to take more classes with her in the future.
5	I didn't much enjoy studying material I have already learned; however, this wasn't Professor Keith's fault.

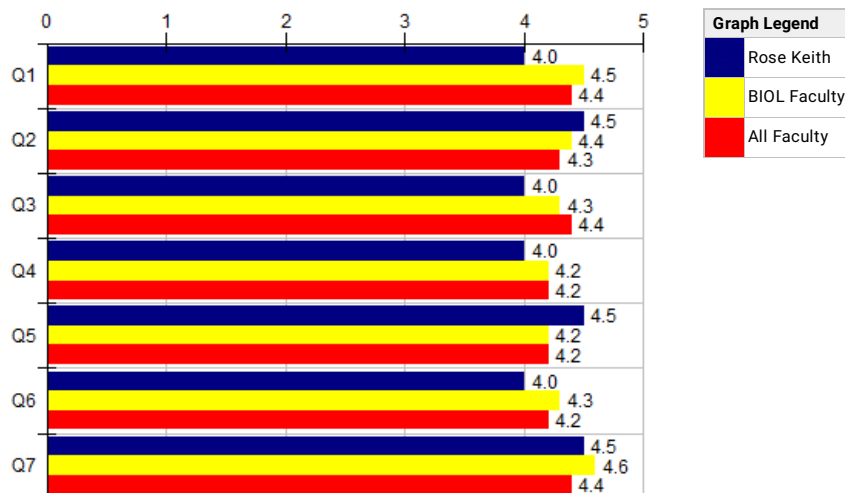

Faculty:	Rose Keith
Question:	If you wish to elaborate, please explain your response to Question #13: The instructor was well prepared.
Response Rate:	12.77% (6 of 47)

1	sometimes the slides were mixed up and questions were not quite answered clearly, but in general, yes
2	Well prepared in theory, but would lose her place occasionally and it took a bit of time to get back on track.
3	Sometimes she would go off on a tangent and then completely back track or skip way ahead. Some slight disorganization.
4	Professor Keith sometimes seemed confused by questions posed in class and didn't seem entirely prepared to answer them. While I appreciate that it is probably difficult to anticipate every question a class will ask, her answers sometimes made the material less clear.
5	Always ready with powerpoint for each section
6	Always had a slide prepared.

Faculty:	Rose Keith
Question:	Are there any other comments you would like to add?
Response Rate:	23.40% (11 of 47)

1	thank you!
2	Very knowledgeable in subject area and very nice. Better at explanations in a one-on-one setting.
3	Thank you for teaching me this term
4	She is an amazing professor. I hope she stays at Knox!
5	Rose is literally the best Bio teacher i've had.
6	Professor Keith is a wonderful professor. I was very impressed by her ability to be so engaging in such a large lecture setting and was amazed to learn she was a new professor. I hope to take more classes from her in the future. Thanks for a great term.
7	N/A
8	It is nice to have a female professor teaching the class, and that she loved what she was teaching.
9	I know you're a newer professor, so I completely understand the difficulties. Practice makes perfect! I think you're great.
10	I feel that I wasn't entirely able to answer these questions properly, as the big lecture-style of class isn't especially conducive to getting to know a professor's teaching style. Hopefully I will get to study with Professor Keith in a smaller class in the future.
11	Good job.

Question:	Are there any other comments you would like to add?
Response Rate:	100.00% (2 of 2)
1	She was very helpful when it came to studying for the first 2 exams but it got a little rocky at the end. I hope she stays at knox.
2	I would like to thank Prof. Keith for being an awesome professor. She was willing to help with anything that we needed and always found ways for hands-on work to help us get a better understanding of the topics.
