

4. Please list one or more specific things your TA did well to help you learn biology.

**Text Response**

She was cheerful and created a positive atmosphere. Furthermore, Rose created a safe space where people could ask questions without feeling dumb or left behind.

Great job getting all students to participate

Was available to discuss questions outside of class and lab.

Very patient and made herself available out of lab time should we need help.

Rose was very enthusiastic about the course material. She clearly prepared for each lab section and was ready to explain difficult or confusing concepts. She was also available after lab for questions about the lecture material, so she went above and beyond in trying to help us

she explained concepts when it seemed the class was struggling

Rose was great. She was attentive to our thoughts and directed us well into the ways of thinking that would be productive in this field of study.

Rose did a great job explaining concepts that the lab class were confused about.

Rose was an amazing TA! She was always happy to answer questions and was very patient during labs when we didn't understand what the next step was. She is also very knowledgeable and very kind!

She was always prepared and has a great understanding of the topic. She was always very helpful in explaining questions I had in lab and from the course material.

She was always very enthusiastic for lab, which made me excited to be there. Also, she made great visuals on the board to help explain concepts. She was great!

Rose was so enthusiastic and made me want to love bio 202 as much as she did! I feel like she really helped me develop my own understanding of the material via guidance instead of just giving me the answers. I also really appreciated how accessible she was outside of class. Her email response time is incredible.

My TA was incredibly enthusiastic about the material and really helped to get us interested in the labs.

Explained the most complicated topics in lab

did a good job explaining concepts

Very good at answering questions during lab. She walked around and made sure everyone understood everything.

She spent a lot of time to explain everything we did instead of just going through the motions.

Talks a lot about stuff

Very accessible

Very good job of explaining material

Incredibly helpful and willing to take extra time for one-on-one explanation.

Explained examples in-depth when students had issues.

Rose was a great TA, she really was invested in her students.

My TA made the class very interactive

5. Please list one or more specific things your TA could improve upon to better help you learn biology.

Text Response
I think it would have been helpful to recap what we learned in last week's lab before proceeding with the current lab, just to help us retain information.
Making the lab period go faster. Some are tedious and she drew them out longer than necessary.
Not sure. Did a good job helping me to learn biology.
Maybe be a little more confident - she clearly knows her content, just needs to come across as more confident.
Um? I really can't think of anything
Perhaps in the way she explains herself on the board?
n/a
One thing that would be beneficial would be to review post-lab assignments (after they have been submitted and graded) to check if we understood all of it.
Possibly integrating more lecture material into the labs.
Maybe better summarize lab activities beforehand
n/a
I think she was a great TA. Rehashing the concepts for exams would be nice.
She was very good at teaching the concepts in biology, however this lab was quite boring so it was sometimes hard to pay attention.
Nothing really
N/A
Provide a bit more assistance with lab methods (e.g. fruit fly transfer)
Honestly can't think of anything.
There sometimes was excessive time between activities

Rose was an awesome TA!
Rose is great!!!!
Rose was so helpful the entire semester!
N/A
I really learned a lot from Rose and I think she did a great job!
One of the best TAs I have had at Duke. She really knows the material and wants to help students learn.
I think that Rose is one of the best TAs a student can hope for. Not only is she very knowledgeable about the material, but she is also incredibly willing to spend time outside of lab to go over concepts with you. I can definitely say that she has helped me with a lot of the lecture material in addition to the lab material, and I really appreciate her enthusiasm for the material. I know students don't really choose their TAs, but I would highly recommend her to any future students.
One of the best TAs I have had at Duke so far!

Nice lady
Excellent job, very thorough and clear presentation of material, and very enthusiastic!
She did a great job this semester, especially when I had questions!
