

4. Please list one or more specific things your TA did well to help you learn biology.

**Text Response**

explained complicated concepts in a simple manner that was easy to understand

Very enthusiastic, could tell she really cared.

explained concepts well

Gentle, understanding demeanor; willing to answer any question, any time; made time for us outside of class to answer emails and hold office hours

Elucidating new knowledge

Rose is just the best- always asked me questions to prompt and extend my learning, was encouraging and positive. Best TA I've had at Duke.

So enthusiastic, great at answering questions

My TA was extremely resourceful and approachable. She was ver enthusiastic about answering students' questions and did an outstanding job explaining concepts. Also, she encourage class participation and had a great deal of respect for the students.

Always available by email for questions about lecture whenever I was confused on course material.

She was very enthusiastic and approachable.

she was enthusiastic

Fully explained concepts even if it took multiple examples and tries.

She was always willing to explain again in case someone did not understand.

Answered as many questions as we had, no matter how repetitive or specific.

Rose taught me to always consider topics from multiple angles and perspectives which was very helpful.

She always knew which topics we needed clarification on even without us voicing this. She could just read the class environment so well and gave great clarifying examples

Explained each topic throughly and completely

She had amazing enthusiasm for the material and deeply cared about her students' success.

Rose was incredibly helpful and accessible to all her students, and lectured well in our lab sections

Rose always walked around during lab to ask us questions about the lab material and to give us chances to ask questions. This helped me especially because I am often reluctant to admit that I do not know something.

I can't rave enough about Rose. She is so accessible, informative, and helpful when it comes to biological concepts. She is great at explaining concepts without making you feel belittled/stupid. I am so sorry to not be with her next semester!

She was very helpful and agreed to stay back after lab to answer questions.

5. Please list one or more specific things your TA could improve upon to better help you learn biology.

**Text Response**

explain more of the why aspect as to what we were doing in lab

Maybe being a bit more vocal.

none

Sometimes seemed a little distracted in lab

Sometimes made labs take longer than they have to

None! Outstanding TA.

Drawing out/over explaining things sometimes.

well, I cannot think of any.

Nothings specifically, she did a great job.

Nothing, Rose was great.

She could probably be a little be stricter with getting people to focus and be quiet

More demos

Possibly make certain lab exercises less dull

Maybe being more imposing, a bit more willing to make her point of view stand out among our own.

I do not think Rose needs to work on anything. She already does more than expected like summarizing the lectures if there is confusion.

If people are done with some part allow lab to run a little more faster.

6. Further comments about your TA:

**Text Response**

very enthusiastic but tended to drag on about unrelated topics

Overall great TA, probably best lab TA I've ever had.

Rose was really the best TA I'd had in a long time. The quality of a course is really heavily dependent (for me) on the TAs and having a TA that is understanding of your limitations, your lack of understanding, but who also challenges you to learn as much as you can was the key to my understanding in this class.

So passionate about the material and it rubs off! great!

I am really glad Rose was my TA this semester.

clarified in class concepts, especially the VGL stuff w/ MK test etc

Very enthusiastic/brings a positive environment to the lab each week.

She is the best!!!

Go

Honestly one of the best TAs I have ever had. So kind, approachable, smart, knowledgeable, and good at teaching. I will miss her

One of the greatest teachers. I enjoyed learning from her more than the instructors.

Rose is great! I am sure all of her students loved having her as a TA.

Rose is one of the best TAs I have ever had. Sorry this is not constructive.

Give her a raise because she's the best TA Bio 202 has!
